

BENSON 15N BASS CABINET USER MANUAL

CONGRATULATIONS

You have purchased a Benson 15N Bass Cabinet. We drew inspiration on from the classic 70s flip top design to create one of the most even sounding and musical cabinet designs we have heard and is a great match for the B700 bass amp, when run solo or in tandem with other cabinets... and yes, it's heavy.

SAFETY INSTRUCTIONS

No user servicable parts inside...do not open or service unless you are a qualified technician.

Do not service while plugged in.

Do not expose to water.

TECHNICAL SPECIFICATIONS

1X15 CELESTION DRIVER RATED AT 8 OHMS 450 WATTS

CARE

If you must clean, do so gently with a dry cloth. For the lacquered fabrics, shine can be restored using chamois cloth to buff the surface lightly.

Do not open the unit or tamper with the speaker wires.

WARRANTY

Our warranty is two years from purchase excluding tubes/abuse. We will repair any unit outside of warranty, often for a nominal fee. For service or information, go to www.bensonamps.com.
